	Urgent	Not Urgent
Important	**Do - (Your MVP)** ● Read a local text file containing session cookies for Brightspace. ● Fetching Data from Brightspace API. ● Local JSON cache creation ● A refresh command that allows the user to refresh JSON cache. ● Basic Terminal output of assignments due in a week.	**Schedule - (For V2.0+)** ● Color-coded text based on urgency. ● Time countdowns that display the number of days before an assignment is due. ● Automatically running the script when the terminal is opened.
Not Important	**Delegate - (Use a library)** ● Use curl for requests to get data from the API. ● Use jq to extract JSON data from the API. ● Use date to handle time and display assignments due in a week.	**Delete - (Cut it)** ● Automated Microsoft Authenticator 2FA bypass. ● GUI Interface with ways to filter assignments, mark them as complete, or add notes. ● Email alerts that contain assignments due soon. ● Pulling assignments from other platforms like Pearson MyLab.
